System Properties - SAP Documentation
Batch Management is integrated in all applications in SAP ERP and is mainly used for defect tracing, callback activities, and regression requirements. SAP ERP is the destination system for the batch and batch characteristic information. SAP MII is used as the connector between the SAP ME Data Collection information and the SAP ERP Batch information.

SAP Library - SAP Manufacturing Execution (SAP ME)
SAP MII is not an MES (Manufacturing Execution System). While a typical MES, such as Tracer Factory, offers specific applications (Traceability, Scheduling, Quality Control, etc), SAP MII offers the framework to build your own applications. SAP MII is not an ERP. By contrast, it is a manufacturing platform.

SAP MII - theodorou.gr
The software uses a service-oriented architecture (SAP Netweaver) and the manufacturing application interoperability is enhanced by the SAP MII and Plant connectivity offerings, the openness of which appeals to many businesses seeking strong ERP and MOM coverage in addition to integration with existing in-house systems.

Exploring Business and MOM Suite Functionality with SAP
SAP MII is a platform that helps manufacturers connect their business operations to the factory floor in real-time, delivering a ISA-95 compliant layer enabling SAP ERP / S4HANA connectivity with real-time plant floor applications.
