ThunderJet™ is a jet-able, externally mounted third fuel circuit that improves the performance of 2-circuit carbs such as the S&S Super. Unmodified, these carbs typically have a low speed, or intermediate, circuit that supplies fuel from idle to approximately 2500 rpm, at which point the carbs' main jet circuit becomes

Access Free Ss Carb Thunderjet Installation

active, delivering more fuel to the engine.

CARB INSTALLATION

Read instructions thoroughly to familiarize yourself with all procedures before beginning installation.

NOTE: Installation of S&S® Super E and G carb kits on certain models is easier with gas tanks removed. Some owners may elect to perform installation without removing gas tanks. This is left to individual
